

Market Growth Models for Energy Efficiency Investments - The Role of Refinancing Models

Invite to Online Stakeholder Workshop

5th November 2021

REFINE has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 894603

When: Friday 5th November 2021, 10:00 to 12:15 CET

Where: Online Conference (MS Teams)

Registration: via email to Marie.Armbruster@e-sieben.at

The REFINE project is delighted to invite you to attend its online stakeholder workshop on Friday 5th November from 10:00 to 12:15 CET. This workshop will bring together key stakeholders in the energy efficiency sector from across Europe and introduce best practice, examples and the core concepts developed in the REFINE project, including rating systems and contract templates. It's an opportunity to network and discuss on the practical application of refinancing instruments involving core stakeholders from the Energy Efficiency Service (EES) market as well as from financial institutions. Core target groups who will benefit from this workshop include:

- EES providers
- Financial institutions with focus on green financing
- Facilitation service provider in the EES market
- EE policy makers

The workshop will present an expert panel of presentations with a case study from partners of the REFINE project. This will be followed by moderated discussions amongst attendees in a breakout session format and a conclusion with a Q&A session.

To register for this workshop, please send an email to Marie.Armbruster@e-sieben.at stating your name, organisation and location. All registered persons will receive a Teams-Link for participating in the event.

AGENDA

Time (CET)	Topic	Speaker
10:00	Introduction: Financing Limits in the EES Business – How refinancing approaches can help	Klemens Leutgöb (e7)
10:10	Refinancing EES projects – Insight into good practice from the Czech Republic	Richard Čada (ČSOB)
10:35	Useful tools to mainstream the application of refinancing in EES projects <ul style="list-style-type: none">• Templates for refinanceable EES contracts• Rating on refinanceability	Klemens Leutgöb (e7)
11:00	Breakout sessions for discussion in smaller groups	Moderators / Rapporteurs from REFINE-team
11:45	Summary of results from breakout session and conclusion	Rapporteurs, Klemens Leutgöb (e7)

OVERVIEW OF REFINE

REFINE is an EU-funded Horizon H2020 project that consists of 11 project partners representing 10 different European countries. The 3-year project kicked off in June 2020 and **aims to improve the supply of financing sources to energy efficiency investments in Europe by promoting the** development of a European energy efficiency market. The project contributes to the European Union's ambitious climate goals for 2030 including the EU Renovation Wave and Green Deal.

The goal of REFINE is to contribute to the supply of sufficient and attractive financing options for energy efficiency services (EES) in Europe. The project's core objectives are enhancing the refinanceability of EES projects and amplifying the use of refinancing schemes in EES business practice.

For the European Union to achieve its energy and climate goals by 2030, significant investment is required to make energy efficiency projects more attractive for potential investors and financial institutions. The European Union has therefore identified the promotion of an energy efficiency service (EES) market in Europe as a priority for the future. In that context, the REFINE project has identified the lack of attractive financing options for EES projects as a major barrier to the development of a functioning, robust EES market in Europe.

Partners in the REFINE project conducted extensive market research including case studies on existing refinancing instruments in Austria, Czech Republic, Belgium and Latvia. Additionally, the project's partners produced a thorough market assessment report into existing sources for financing in nine countries across Europe. Following this research, REFINE partners have now begun to work on developing new tools to simplify and streamline the process of refinancing for energy efficiency projects. Full results can be explored [here](#).

- REFINE aims to promote the development of a European energy efficiency market
- REFINE will develop new schemes to make it easier to finance energy efficiency investments including standardised contracts and rating systems
- The REFINE project consists of 11 partner countries from across Europe with expertise in financing and energy efficiency

REFINE has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 894603.

REFINE

Looking forward to
welcoming you to the
workshop!
